WORK EXPERIENCE & INTERNSHIPS

Let's R.O.T.I | Operations Head *Dec'23 – Present*

- Scaled a Discord-based automation startup to **70K+ servers and 11M+ combined members** through community-led growth strategies.
- **Led growth and operations**, overseeing user acquisition, retention, monetization, and community expansion.
- **Drove ~7% premium conversion** through targeted product optimization and growth initiatives.
- **Led 6 functional divisions** across technical, marketing, and expansion functions, coordinating cross-functional execution and team operations.

Overlab.in | Technical Operations Lead *Oct'25 – Present*

- **Architected and automated** the organization's mailing and cloud infrastructure, while optimizing the website **TTFB** for improved responsiveness.
- **Raised website conversion rates by ~25%** through data-driven UI/UX changes and optimization of the founders' lead-capture workflow.
- **Cut infrastructure and software costs by ~30%** through resource optimization across hosting, development, and SaaS subscriptions.
- **Achieved sub-1-second average page-load times** using **CDNs, server-side page caching, and Redis**, significantly improving website performance.

Mr. Random|Community Manager & Developer *Jan'21 – Aug'25*

- Maintained infrastructure and community operations for the **#1-ranked Indian** and **#8 globally most-voted Minecraft server.**
- Managed end-to-end execution of the channel's most viral video for an **800K+ youtube audience**, overseeing ideation, budgeting, and execution to raise **₹25 lakh+ for charity.**
- **Developed custom maps and 10+ plugins** for 3 Minecraft events, collectively generating **1.5M+ views**, while coordinating moderators, creators, and community teams.

TECHNICAL PROJECTS

Technical Projects & Contributions	**IPL Experience-Points (XP) Betting System |Mr. Random |[View Project]** *April'25* • Engineered a real-time IPL prediction and XP-betting system using **Python & Discord.py**, automating match predictions, wagers, payouts, and refunds for a large gaming community. • Designed the system to **discourage real-money gambling among a predominantly young community**, allowing participation without monetary stakes. • **Processed 25M+ XP in wagers and** 18M+ XP in player winnings, managing the system across **60+ live matches and 200+ hours of gameplay**. **Base64 Encoding & API Usage Management |[View Source Code]** *April'25* • Developed a **custom Base64 encoding API** that converts strings into Base64, enabling Base64 functionality within TagScript, a lightweight language for extending Discord bots with custom commands and functionality. • Built a **usage-management dashboard to monitor API requests**, track per-user consumption, and enforce configurable rate and usage limits. **Server-Side Vouch API |[View Source Code]** • Developed a Python-based **server-side Vouch API supporting vouch read/write operations** and dynamic leaderboards, with direct HTTP integration into TagScript. • **Contributed to the TagScript open-source ecosystem** by proposing and implementing a native fetch capability, enabling TagScript scripts to consume external APIs without requiring a dedicated intermediary backend. • **Authored beginner-friendly integration documentation**, simplifying API adoption for non-developers and enabling users to configure and use the functionality with minimal technical setup.

POSITIONS OF RESPONSIBILITY

DoMS NALSAR	**Training & Placement Advisory Cell | Member** *Aug'26 — Present* Selected as 1 of 4 members from 70 students for the Training & Placement Advisory Cell, **facilitating industry and alumni outreach for internships and placements.** **NALSAR Entrepreneurship Foundation |Associate** *Sep'26 – Present* Contributing to the **incubation of startups**, helping **take ventures from the ideation stage through go-to-market**, while supporting multiple startups across go-to-market and market research phases.

ACHIEVEMENTS & ENTREPRENEURSHIP

Co-Curricular Achievements	• Advanced through two rounds of the **Bihar Startup Funding Initiative** under the **Startup India Initiative** with a self-founded EdTech startup. • **Co-founded Profile.beer**, a profile-sharing platform with 200+ assets, gaining **recognition from popular Indian creators with a combined audience of 20M+ subscribers.**
Sports	Completed a **20 km uphill charity cycling drive** through the Kurseong–Darjeeling region in 2023.
Interests	Wearable & programmable electronics, Reading
